ULTRA PCs

The Right Products For Our Times!

ULTRA Power and ULTRA Performance delivered by Infotel.

With almost 30 years of experience in servicing and supporting the U.S. Channel we're a proud division of a Fortune 1000 company standing behind every computer we sell. We offer direct pricing and quality systems built with the world's best components, and backed by Infotel's Maximum Service Customer Care Plan. Whether you need a single powerful PC for a home, or hundreds for an office, Infotel has crafted a configuration that will drive your future. We can customize your new ULTRA PC any way you like. Tell us what you need; we'll take care of everything. And after you get underway with your new ULTRA PC, you'll know that if you have any questions or problems arise, you can count on Infotel to help and keep on helping.

The Infotel Commitment To Excellence

We know there's a number of PC makers that can build you a system. But building a great system is where the job really begins and where Infotel starts to emerge as a different kind of PC company. One that stands out in the crowd.

Consistent Manufacturing Quality

ULTRA PCs are manufactured in an ISO 9001:2000 certified facility. This certification guarantees the highest international standards possible for design, engineering, manufacturing and distribution. Each PC goes through stringent quality control checkpoints covering 180 items. We test every input, output, memory, cache, hard drive, disk drive and processor component through multiple test cycles. This makes ULTRA one of the most reliable systems available today.

Every ULTRA System undergoes extensive quality control in their ISO 9001:2000 certified factory.

ULTRA PCs are manufactured in an ISO 9001:2000 certified facility.

Infotel integrates the highest quality components into every PC they make!

Every ULTRA PC is backed by American Support and the industry's best warranty.

Highest PC Value

ULTRA PCs provide value without compromise. Ultra PCs deliver the latest technology at very affordable pricing, giving you much more value for your dollar.

Reliability, Compatibility, & Performance

We only use the highest quality components from leading manufacturers, including the most trusted names in the business. Brands such as: Intel, AMD, Microsoft, ASUS, Western Digital, Seagate, Micro-Star, 3Com, ATI, Sony, NVIDIA, etc.

American Products and American Jobs

ULTRA PCs are not made in some nameless plant in China. Our PCs are manufactured and shipped from our facilities in Ohio. Infotel chooses to help hold the line and keep technology jobs in the U.S. Infotel also supports their products from their own support centers in America, not India or somewhere else. So next time you look at a PC, look beyond the physical features to the place it's manufactured and the people that make it.

Which PC company is 100% American?

Infotel!

The Best Value!
The Best Technology!

Ask your current PC vendor 3 questions:

1. Are 100% of their systems assembled in the USA by USA workers?
2. Are 100% of their tech support and emails answered in the USA by USA workers?
3. Do they have a company policy to NEVER export American jobs?

If they can't answer YES to all 3 questions, then come ask us.
